

FW 551 - References

Most of this reference list is courtesy of Dr. Burnham. The references have been given an importance-value with regards to the topics in this course: H (high), M (medium), L (low), and B (background material which the student should be familiar with).

Achen, C.H. 1986. *The Statistical Analysis of Quasi-experiments*. University of California Press. Berkeley, CA, USA. (L, entirely in a sociological setting, but very good on the differences of randomized vs. quasi-experimental designs and problems of the latter).

Andelt, W.F. 1992. Effectiveness of livestock guarding dogs for reducing predation on domestic sheep. *The Wildlife Society Bulletin* 20:55-62. (L, but this is an example of a good retrospective quasi-experiment).

Anderson, R.L. 1990. Gertrude Mary Cox, January 13, 1890-October 17, 1978. pp 117-129 in *Biographic Memoirs*, National Academy of Sciences, Washington, D.C. (L, but you should know that much of statistics in the USA traces back to this remarkable woman Ms. Cox; this is paper is included in the packet, but is not an assigned reading)

Anderson, D. R., K. P. Burnham, W. R. Gould, and S. Cherry. 2001. Concerns about finding effects that are actually spurious. *Wildlife Society Bulletin* 29:311-316.

Anderson, S., A. Auquier, W.W. Hauck, D. Oakes, W. Vandaele, and H.I. Weisberg. 1980. *Statistical Methods for Comparative Studies*. John Wiley and Sons. New York. (1-5, 32-37, 43: Section 4.6, 69-71, & Chapter 14; all rated H)

Armour, C.L., K.P. Burnham and W.S. Platts. 1983. Field methods and statistical analyses for monitoring small salmonid streams. *FWS/OBS/33. WELUT*, USFWS, Ft. Collins, CO. (105-127, H)

Baker, J.J.W. and G.E. Allen. 1968. *Hypothesis, Prediction, and Implication in Biology*. Addison-Wesley. Reading, MA. (39-45, H) (a good general background book also.)

Barrow, J. D. 1991. *Theories of everything: The quest for ultimate explanation*. Clarendon Press, Oxford. 223 pp. (L for this class, but a good book re philosophy of science, see especially algorithmic compressibility).

Bart, J. and J. D. Schoultz. 1984. Reliability of singing bird surveys: changes in observer efficiency with avian density. *The Auk* 101:307-318. (H)

Bartholomew, G. A. 1982. Scientific innovation and creativity: A zoologist's point of view. *American Zoologist* 22:227-235.

Beveridge, W.I.B. 1957. *The Art of Scientific Investigation*. Norton. New York. (Chapters 5 [except the middle of page 86] & 6 H; the entire book is worth reading, it is a classic. It is available in paperback for around \$5)

Box, G.E.P. 1974. Statistics and the environment. *J. Washington Academy of Science* 64:52-59. (L)

Box, G.E.P. 1976. Science and statistics. *J. of the American Statistical Association* 71:791-799. (L)
