INSTRUCTIONS FOR USE AND APPLICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

CROP & APPLICATION TIMING	PESTS CONTROLLED	DOSES	RECOMMENDATIONS
Coffee Established plantings	Leaf miner (<i>Leucoptera coffeella</i>) Nematodes: (<i>Pratylenchus</i> spp.) (<i>Meloidogyne</i> spp.)	13-20 gm	First, remove trash and weeds from 1.2 m around each tree. Make a uniform application of the granules under the drip line. Lightly incorporate granules in soil with an appropriate implement. If no rain within 7 days after application, irrigate to move active ingredient into the root zone. If necessary, repeat application 4-6 months later, but no more than 2 applications per year.

PRE-HARVEST AND GRAZING LIMITATIONS

To avoid excessive residues in:

Coffee beans:

- Do not apply later than 90 days before harvest.
- Do not make more than 2 applications per year.
- Do not exceed the dose of 33 kg/ha TEMIK® 15G in high density plantings.
