(Received 10 June 2006; accepted 28 July 2006)

Abstract

Distribution of *Cornops aquaticum*, *C. brevipenne*, *C. frenatum* and *C. paraguayense* is given for Latin America and the Caribbean Islands, along with native host plants and other plants that are repeatedly attacked. A database has been produced following new examinations of museum specimens. Occurrences are depicted in maps arranged to collecting localities and biogeographic provinces.

Resumo

A distribuição de *Cornops aquaticum*, *C. brevipenne*, *C. frenatum* e *C. paraguayens* é apresentada para a América Latina e Ilhas do Caribe, juntamente com as plantas hospedeiras nativas e outras plantas repetidamente atacadas. Um banco de dados baseado em novas investigações de indivíduos depositados em museus foi produzido. As ocorrências são representadas em mapas conforme as localidades de coleta e províncias biogeográficas.

Keywords: biological control, Latin America, macrophytes, Neotropics, Pontederiaceae, South America, water hyacinth

Introduction

The Neotropical grasshopper genus *Cornops* Scudder, 1875 (revised by Roberts & Carbonell, 1979) inhabits lowlands from southern Mexico to Central Argentina and Uruguay. It currently comprises one terrestrial species that reproduces on terrestrial host plants (*Cornops frenatum*) and two (or three) semi-aquatic species that reproduce on aquatic macrophytes (*Cornops aquaticum* and *Cornops paraguayense*; possibly *Cornops brevipenne*, also found in swamps and marshes).

Cornops aquaticum, host-specific to *Eichhornia* spp. and *Pontederia* spp. (cf. Adis & Junk, 2003; Lhano et al., 2005), is planned to be released in South Africa as a biological control agent of the water hyacinth *E. crassipes* (cf. Oberholzer & Hill, 2001). Co-evolution of the grasshopper and its host plant (cf. Adis et al., 2004; Brede & Beebee, 2005) is

presently under study in a project called HIWCA (host-insect co-evolution on water hyacinth) involving 10 countries (Argentina, Brazil, Colombia, France, Germany, Nicaragua, South Africa, Trinidad, UK and Uruguay), under the auspices of the Tropical Ecology Working Group of the Max-Planck-Institute for Limnology at Plön, Germany (www.mpil-ploen.mpg.de).

The objective of this contribution is to provide distribution maps for all *Cornops* species to facilitate further ecological studies.

Materials and methods

Distribution is based on adult collection specimens examined by M. Lhano (AMNH, ANSP, FCMU, INPA, JA, NHMH, SUREHMA, UFMT, UMMZ), C. Amédégnato (NHM, MNHN), A. L. Nunes

Correspondence: J. Adis, Tropical Ecology Working Group, Max-Planck-Institute for Limnology, Postfach 165, 24302 Plön, Germany. Fax: +49 4522 763 281. Email: adis@mpil-ploen.mpg.de

(MPEG, INPA) and J. Adis (ZFMK). Specimens listed from the National Museum at Rio de Janeiro (UFRJ) were formerly identified by C. S. Carbonell, Montevideo, Uruguay. Round brackets indicate data that are not on the museum labels and were complemented by the authors of this contribution. The following abbreviations are used in the text: ?, locality uncertain or unknown, mostly omitted from maps; AMNH, American Museum of Natural History, New York, USA; ANSP, Academy of Natural Sciences of Philadelphia, Pennsylvania, USA; FCMU, Facultad de Ciencias, Montevideo, Uruguay; INPA, Instituto Nacional de Pesquisas da Amazônia, Manaus, Brazil; NHM, The Natural History Museum, London, UK; JA, Voucher Collection of Joachim Adis, Max-Planck-Institute for Limnology, Plön, Germany; MNHN, Muséum national d'Histoire naturelle, Paris, France; MPEG, Museu Paraense Emílio Goeldi, Belém-PA, Brazil; NMNH, National Museum of Natural History, Smithsonian Institution, Washington, DC, USA; UFMG, Entomological Collection, Departamento de Biologia, C.C.B.S., Universidade Federal de Mato Grosso, Cuiabá, MT, Brazil; UFRJ, Museu Nacional, Rio de Janeiro, RJ, Brazil; UMMZ, Museum of Zoology, University of Michigan, Ann Arbor, MI, USA; ZFMK, Forschungsmuseum Koenig, Bonn, Germany.

In general, semiaquatic Neotropical acridids are poorly collected and therefore two types of map (Figures 2–5) are given for *Cornops* distribution in Latin America and the Caribbean Islands: Left map: local occurrences according to collection data. Sample localities and their positions were cross-checked with Google Earth [Internet], Global Gazetteer [Internet] and Satellite Views [Internet]; right map: area occurrences according to biogeographic provinces (according to Morrone, 2006). For each examined specimen the biogeographic province is given in square brackets for the respective distribution locality in the text. A map on the vegetation structures in Latin America and the Caribbean Islands (according to Hueck & Seibert, 1972; Cabrera & Willink, 1973) is given as additional information (Figure 1).

Results

Cornops Scudder, 1875

Synonymy. *Paracornops* Giglio-Tos, 1894.

Distribution

Southern Mexico to Central Argentina and Uruguay.

List of *Cornops* species

- Cornops aquaticum* (Bruner, 1906)
- Cornops brevipenne* Roberts & Carbonell, 1979
- Cornops frenatum* (Marschall, 1836)
 - C. f. frenatum* (Marschall, 1836)
 - C. f. cannae* Roberts & Carbonell, 1979
- Cornops paraguayense* (Bruner, 1906a)

Cornops aquaticum (Bruner, 1906) (Figure 2)

Synonymy. *Cornops pelagicum* Bruner, 1919; *Cornops scudderi* Bruner, 1906; *Paracornops politum* Bruner, 1906.

Distribution. Argentina, Belize, Bolivia, Brazil, Colombia, Ecuador, French Guiana, Guatemala, Guyana, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Suriname, Trinidad, Uruguay, Venezuela; up to 2184 m a.s.l. (Colombia: Antioquia: Medellin).

Native host plants. *Eichhornia crassipes*, *E. azurea*, *Pontederia cordata*, *P. lanceolata* (all Pontederiaceae) (Zolessi, 1956; Guido & Perkins, 1975; Adis & Victoria, 2001; Ferreira & Vasconcelos-Neto, 2001; Lhano et al., 2005).

Figure 1. Vegetation structures in Latin America and the Caribbean Islands (according to Hueck & Seibert, 1972; Cabrera & Willink, 1973).

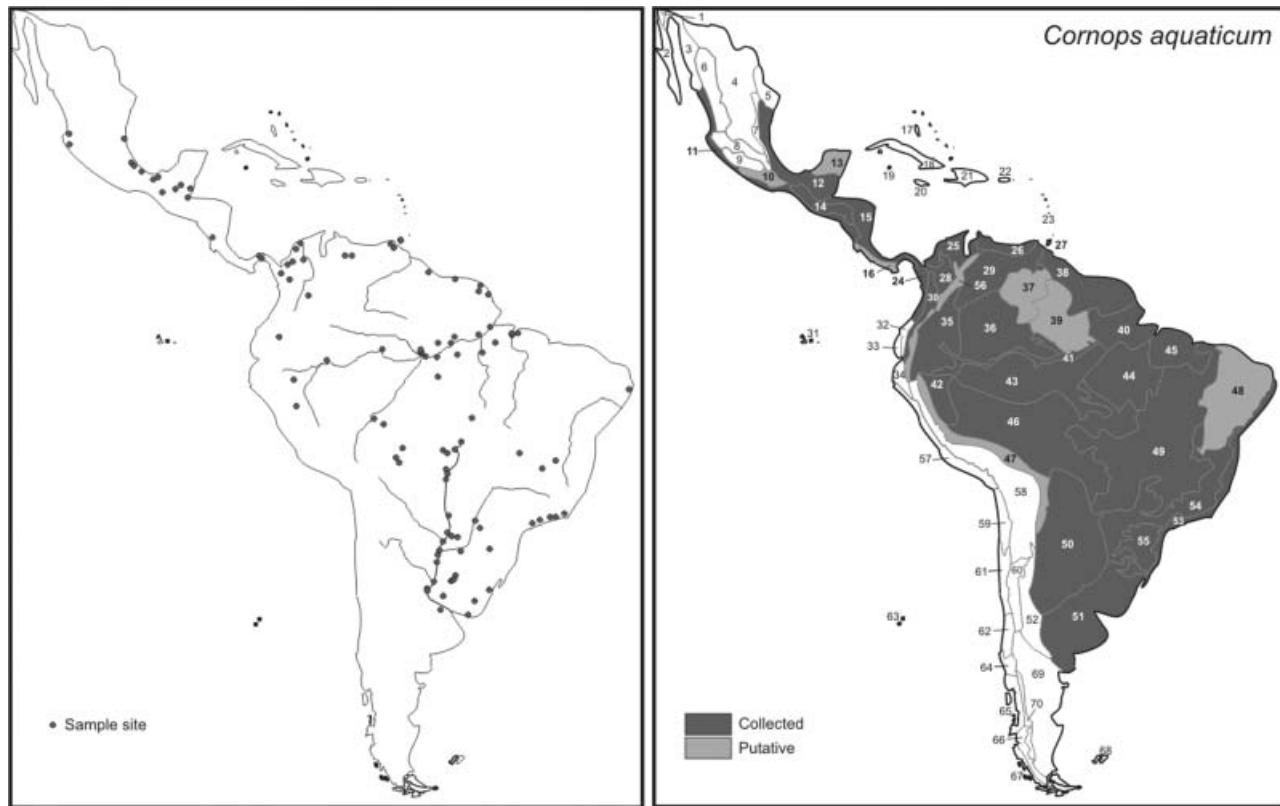

Figure 2. Distribution of *Cornops aquaticum* in Latin America and the Caribbean Islands. Left: Local occurrences according to collection data. Right: Area occurrences according to biogeographic provinces (according to Morrone, 2006): 1, California; 2, Baja California; 3, Sonora; 4, Mexican Plateau; 5, Tamaulipas; 6, Sierra Madre Occidental; 7, Sierra Madre Oriental; 8, Transmexican Volcanic Belt; 9, Balsas Basin; 10, Sierra Madre del Sur; 11, Mexican Pacific Coast; 12, Mexican Gulf; 13, Yucatan Peninsula; 14, Chiapas; 15, Eastern Central America; 16, Western Panamanian Isthmus; 17, Bahama; 18, Cuba; 19, Cayman Islands; 20, Jamaica; 21, Hispaniola; 22, Puerto Rico; 23, Lesser Antilles; 24, Choco; 25, Maracaibo; 26, Venezuelan Coastal; 27, Trinidad and Tobago; 28, Magdalena; 29, Venezuelan Llanos; 30, Cauca; 31, Galapagos Islands; 32, Western Ecuador; 33, Arid Ecuador; 34, Tumbes-Piura; 35, Napo; 36, Imeri; 37, Guyana; 38, Humid Guyana; 39, Roraima; 40, Amapá; 41, Várzea; 42, Ucayali; 43, Madeira; 44, Tapajós-Xingu; 45, Pará; 46, Pantanal; 47, Yungas; 48, Caatinga; 49, Cerrado; 50, Chaco; 51, Pampa; 52, Monte; 53, Brazilian Atlantic Forest; 54, Paraná Forest; 55, Araucaria angustifolia Forest; 56, North Andean Paramo; 57, Coastal Peruvian Desert; 58, Puna; 59, Atacama; 60, Prepuna; 61, Coquimbo; 62, Santiago; 63, Juan Fernandez Islands; 64, Maule; 65, Valdivian Forest; 66, Magallanic Forest; 67, Magallanic Paramo; 68, Malvinas Islands; 69, Central Patagonia; 70, Subandean Patagonia.

Other plants repeatedly attacked. *Jaborosa integrifolia* (Solanaceae), *Ludwigia* spp. (Onagraceae), *Oxycarium cubense* (Cyperaceae), *Paspalum repens* (Poaceae/Graminaceae), *Pistia* spp. (Araceae), *Pontederia* spp. (Pontederiaceae), *Salvinia* spp. (Salviniaceae), *Thalia multiflora* (Marantaceae), lettuce (*Lactuca sativa*; Asteraceae), rice (*Oryza* spp.; Poaceae/Gramineae), sugarcane (*Saccharum officinarum*; Poaceae/Gramineae), *Pontederia cordata* (Pontederiaceae) and possibly some Commelinaceae (*Commelina virginica*, *Tradescantia virginiana*, *Tripogandra elongata*) (cf. Guido & Perkins, 1975; Ferreira & Vasconcelos-Neto, 2001; Vieira & Santos, 2003; Lhano et al., 2005; J. Adis, S. Capello, C. Franceschini, A. L. Nunes, all unpublished).

Examined specimens

Argentina: Buenos Aires, Campaña ($34^{\circ}09'S$, $58^{\circ}36'W$) [51], 3 February 1970 (B. D. Perkins),

1♀—NMNH. Corrientes, Bella Vista ($28^{\circ}31'S$, $59^{\circ}00'W$) [50], 7–8 January 1972 (M. Descamps), 1♂, 1♀—ANSP; 2♂♂, 1♀—MNHN. Corrientes, Corrientes, Rio Paraná: Isla Barranqueira ($27^{\circ}29'S$, $58^{\circ}53'W$) [50] 14 February 2005 (C. Franceschini), on big *E. azurea* leaves, 1♂, 1♀—JA. Corrientes, Corrientes, Laguna Pampin-Rio Paraná ($27^{\circ}30'S$, $58^{\circ}45'W$) [50], on *E. azurea* (A. Poi de Neiff et al.), 1♂, 1♀—JA. Corrientes, Corrientes, Madrejón El Puente (Norte)-Rio Paraná ($27^{\circ}26'33"S$, $58^{\circ}51'20"W$) [50], 28 January 2004 (A. Poi de Neiff et al.), on *E. crassipes*, 1♂, 1♀—JA. Corrientes, lower Rio Paraguay ($27^{\circ}15'S$, $58^{\circ}35'W$) [50], 12 February 2005 (C. Franceschini, S. Capello), on *E. azurea*, 1♂, 1♀—JA. Entre Ríos, La Paz ($30^{\circ}45'S$, $59^{\circ}36'W$) [50], 14 January 1940, 1♂, 1♀—ANSP. Entre Ríos, Pronunciamiento ($32^{\circ}20'S$, $58^{\circ}26'W$) [51], November 1963 (Walz), 1♂—ANSP. Formosa, Clorinda ($25^{\circ}17'S$, $57^{\circ}43'W$)

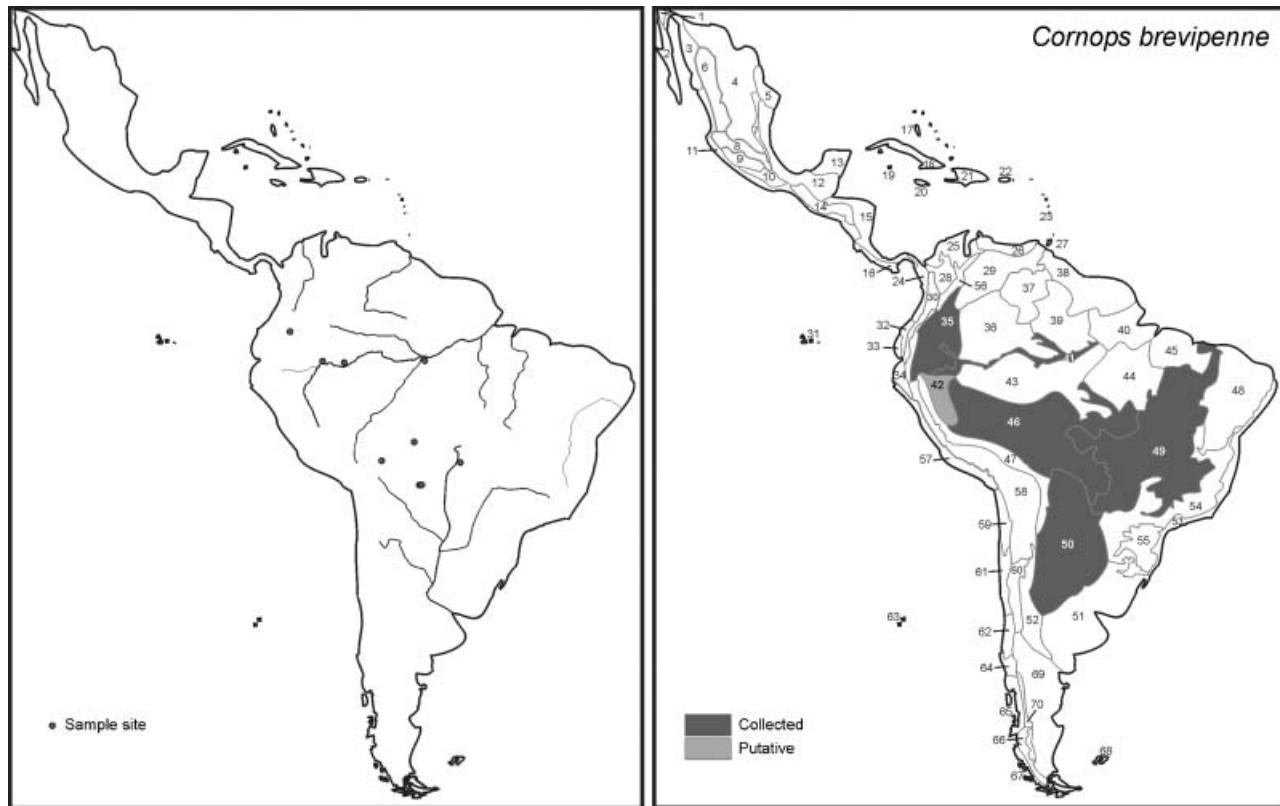

Figure 3. Distribution of *Cornops brevipenne* in Latin America and the Caribbean Islands. Left: Local occurrences according to collection data. Right: Area occurrences according to biogeographic provinces (according to Morrone, 2006; see Figure 2 for details of 1–70).

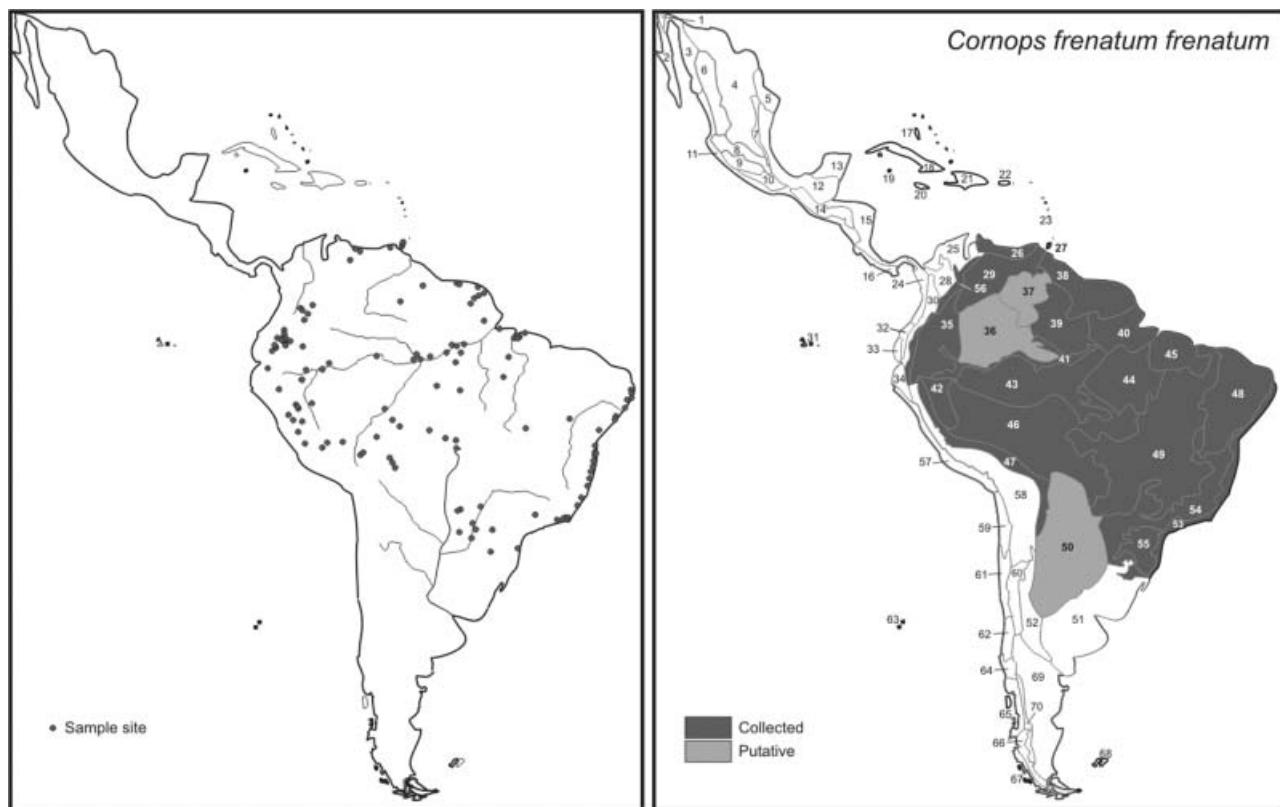

Figure 4. Distribution of *Cornops frenatum frenatum* in Latin America and the Caribbean Islands. Left: Local occurrences according to collection data. Right: Area occurrences according to biogeographic provinces (according to Morrone, 2006; see Figure 2 for details of 1–70). 34, Tumbes–Piura—occurrence of *C. f. frenatum* solely on eastern slopes of the Andes (C. Amedeganto, unpublished).

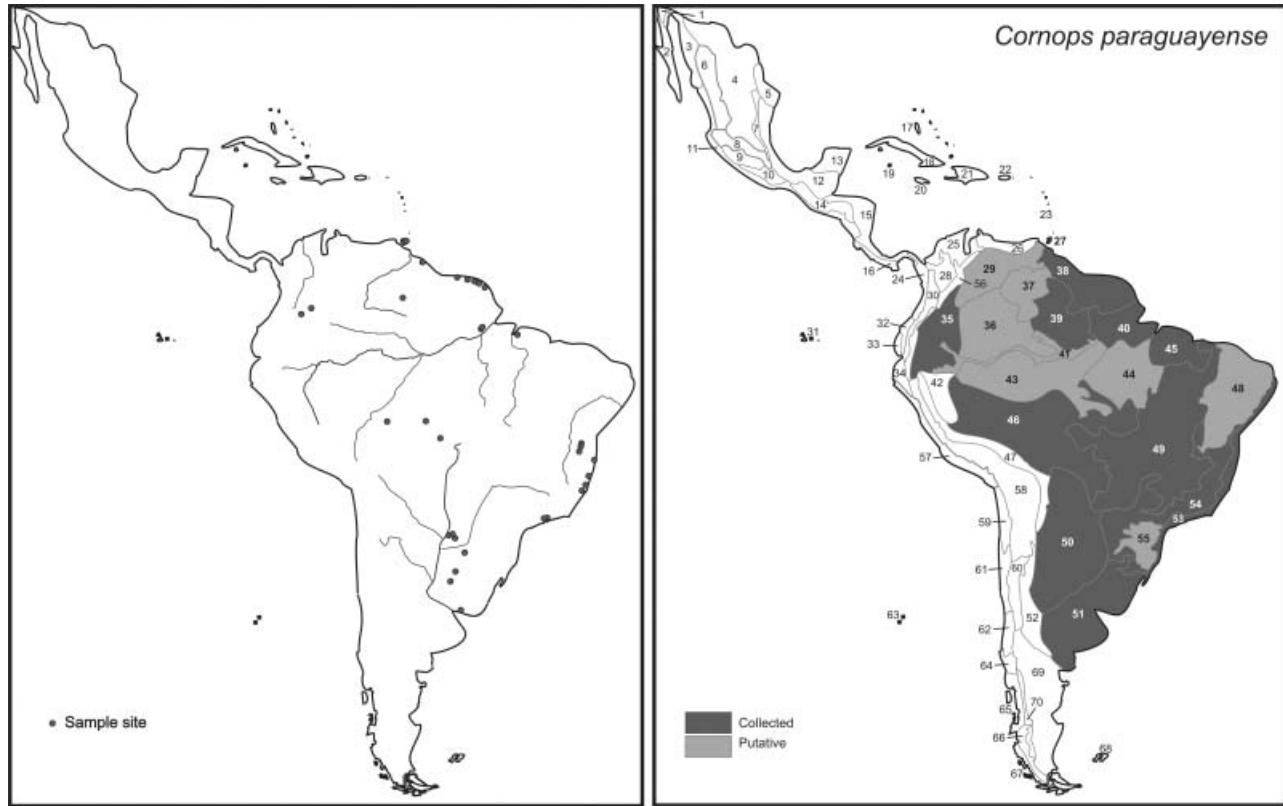

Figure 5. Distribution of *Cornops paraguayense* in Latin America and the Caribbean Islands. Left: Local occurrences according to collection data. Right: Area occurrences according to biogeographic provinces (according to Morrone, 2006; see Figure 2 for details of 1–70).

[50], 12 January 1972 (M. Descamps), 1♂, 2♀—MNHN. Formosa, Formosa ($26^{\circ}10'S$, $58^{\circ}10'W$) [50], 23 July (P. Jorgensen), 1♂—ANSP. Misiones, Posadas ($27^{\circ}23'S$, $55^{\circ}54'W$) [50], November 1941 (Daguerre), 1♂, 1♀—NMNH; Santa Fé, Capital (=Santa Fé) ($31^{\circ}37'S$, $60^{\circ}41'W$) [50], March 1941 (Daguerre), 1♂—NMNH. Santa Fé, Santa Fé, Laguna El Puesto ($31^{\circ}43'64"S$, $60^{\circ}39'04"W$) [51], 30 January 2004 (S. Capello, E. Drago, J. Adis), on *E. crassipes*, 1♂, 1♀—JA. Santa Fé, Santa Fé, Rio Catarata ($31^{\circ}42'33"S$, $60^{\circ}45'22"W$) [50], 26 January 2004 (E. Drago, M. Marchese, J. Adis), on *E. crassipes*, 1♂, 1♀—JA. C. de Zolessi or C. S. Carbonell), 24♂♂, 28♀♀—FCMU. Maldonado, Piriapolis, Laguna del Sauce ($34^{\circ}50'S$, $55^{\circ}09'W$) [51] (M. G. Lhano), 14 January 2004, on *E. azurea*,

1♂, 1♀—JA. **Venezuela:** Cojedes, Hato Mata Clara (9°00'00"N, 68°30'00"W) [29], 12 July 1981 (Otte et al.), 1♀—ANSP. Delta Amacuro, Caño d'Vagre (9°41'N, 62°20'W) [26], 28 January 1911 (S. Brown), 1♂—ANSP. Guarico, Calabozo area (8°56'N, 67°25'W) [29], 14 July 1981 (Otte et al.), 1♂—ANSP. Sucre, Cariquito (10°37'N, 63°18'W) [29], January 1911 (S. Brown), 1♀—ANSP.

Cornops brevipenne Roberts & Carbonell, 1979 (Figure 3)

Synonymy. None.

Distribution. Bolivia, Brazil, Ecuador and Peru; up to 400 m a.s.l. (Bolivia: Santa Cruz: Buena Vista-Portachuelo).

Native host plants. Unknown.

Other plants repeatedly attacked. Unknown.

Examined specimens

Bolivia: Beni, Río Itenez at mouth of Río Baures (12°30'S, 64°16'W) [46], 10 October 1964 (S. K. Bauseman), 1♂—ANSP. Beni, Rurrenabaque, 227 m (14°27'S, 67°33'W) [46], 10–23 October 1956 (L. E. Peña), 2♀—UMMZ. Santa Cruz, between Buena Vista and Portachuelo, 400 m (17°23'S, 63°32'W) [50], 18–20 February 1976, marshes (Ronderos, Roberts), 4♂♂, 6♀♀ (including the holotype)—ANSP. Santa Cruz, Montero, Asahi Hotel (17°19'S, 63°15'W) [50], 19 February 1976 (Ronderos, Roberts), 1♀—ANSP. **Brazil:** Amazonas, Manaus, Ilha de Marchantaria (3°14'S, 59°57'W) [41], 18 May 2006 and 14 July 2006 (C. E. Braga), 2♂♂—INPA. **Ecuador:** Sucumbios, Shushufindi (0°10'S, 76°39'W) [35], 13 March 1982 (G. Couturier, G. Onoré), 1♂, 1♀—MNHN. **Peru:** Loreto, Iquitos, Quisto Cocha (3°49'S, 73°16'W) [41], 8 July 1980 (M. J. W. Cock), 1♂, 1♀—NHM.

Cornops frenatum (Marschall, 1835)

Distribution. Argentina, Bolivia, Brazil, Colombia, Ecuador, French Guiana, Guyana, Paraguay, Peru, Suriname, Trinidad and Venezuela.

Cornops frenatum frenatum (Marschall, 1835) (Figure 4)

Synonymy. *Cornops bivittatum* Scudder, 1875; *Cornops insularis* Bruner, 1908; *Cornops longicorne* (Bruner, 1911); *Gryllus frenatus* Marschall, 1835; *Gryllus lineatus* Thunberg, 1824.

Distribution. Bolivia, Brazil, Colombia, Ecuador, French Guyana, Guyana, Paraguay, Peru, Suriname, Trinidad and Venezuela; up to 1600 m a.s.l. (Venezuela: Aragua).

Native host plants. *Heliconia* spp. (Musaceae) (A. Pfrommer, unpublished MSc thesis, University of Hamburg, Germany, 1990) and possibly *Eichhornia* spp. (Pontederiaceae) (cf. Benett, 1970).

Other plants repeatedly attacked. *Panicum pilosum* (Gramineae) (J. Adis & M. I. Marques, unpublished).

Examined specimens

Bolivia: Beni, Rurrenabaque (14°27'S, 67°33'W) [46], October 1956 (L. E. Peña), 31♂, 42♀—UMMZ. Cornops frenatum cannae Roberts & Carbonell,

1979

Synonymy. None.

Distribution. Only found at Tucumán, Argentina (Turk, 1984); up to 750 m a.s.l. (Argentina: Tucumán: 110 km SW Tucumán).

Native host plants. *Canna edulis*, *Canna coccinea* and other *Canna* spp. (Turk, 1984).

Other plants repeatedly attacked. *Heliconia* spp. (Turk, 1984).

Examined specimens

Argentina: Tucumán, 10 km SE of Tucumán, route 9, km 1281, on *Canna* ($26^{\circ}53'S$, $65^{\circ}07'W$) [50], 9–24 March 1979 (H. R. Roberts), 5♂, 11♀ (including the holotype)—ANSP. Tucumán, Tucumán, 110 km SW of city, rt 38, on *Canna* (750 m) ($27^{\circ}41'S$, $65^{\circ}46'W$) [50], 12 March 1979 (H. R. Roberts), 1♂, 2♀—ANSP. Tucumán, 25 km W de Monteros, 700 m, edge of wet forest, *Canna* in vicinity ($27^{\circ}10'S$, $65^{\circ}40'W$) [50], 26 March 1979 (H. R. Roberts), 1♀—ANSP.

Cornops paraguayanense (Bruner, 1906) (Figure 5)

Synonymy. *Cornops ignotum* Rehn, 1918; *Paracornops paraguayanense* Bruner, 1906.

Distribution. Argentina, Bolivia, Brazil, Colombia, French Guiana, Guyana, Paraguay, Suriname, Trinidad and Uruguay; up to 700 m a.s.l. (Brazil: Minas Gerais: rt 116-Salinas).

Native host plants. *Typha* sp. (Turk & Aquino, 1996).

Other plants repeatedly attacked. *Eichhornia crassipes* (Roberts & Carbonell, 1979).

Examined specimens

Argentina: Corrientes, 30 km N de Paso de los Libres ($29^{\circ}26'S$, $57^{\circ}04'W$) [50], 20 March 1965 (Carbonell, Mesa, Monné), 5♂, 7♀—FCMU. Misiones, Posadas ($27^{\circ}23'S$, $55^{\circ}54'W$) [54] March 1940 (Daguerre), 1♂, 2♀—NMNH. **Bolivia:** Beni, Valleitenez (=Valle Itenez, wrong coordinates given in Roberts & Carbonell, 1979) ($11^{\circ}55'S$, $65^{\circ}01'W$ =mouth Rio Itenez/Rio Marmore) [46], 3 March 1976 on Río Itenez (Ronderos, Roberts), 1♀—ANSP. **Brazil:** Bahia, between Alcobaça and rt 101 ($17^{\circ}27'S$, $39^{\circ}13'W$) [53], 26 November 1974, marsh (Roberts, Carbonell), 2♂, 1♀—ANSP. Espírito Santo, Cariacica ($20^{\circ}16'S$, $40^{\circ}25'W$) [53], December 1977 (B. Silva), 4♂, 4♀—UFRJ. Espírito Santo, Itapemirim Falls, 1–6 km E of rt 101, forest edge and marsh ($21^{\circ}02'S$, $40^{\circ}57'W$)

[53], 5 December 1974 (Roberts, Carbonell), 2♂♂—ANSP. Espírito Santo, Itapemirim Falls, near coast ($21^{\circ}02'S$, $40^{\circ}57'W$) [53], 5 December 1974 (Roberts, Carbonell), 3♂♂—ANSP. Espírito Santo, Linhares ($19^{\circ}23'S$, $40^{\circ}02'W$) [53], September 1972 (Moacir Alvarenga), 1♀—UMMZ. Mato Grosso (=MT), 30 km N of Uirapuru, Chapada dos Parecis ($14^{\circ}43'S$, $58^{\circ}30'W$) [49], 1–15 December 2002 (A. Foucart), 3♂♂, 4♀♀—MNHN. Minas Gerais, Pedra Azul ($16^{\circ}1'S$, $41^{\circ}16'W$) [54], November 1972 (Moacir Alvarenga), 1♀—UMMZ. Minas Gerais, Pedra Azul ($16^{\circ}1'S$, $41^{\circ}16'W$) [54], October 1977 (O. Roppa), 3♀♀—UFRJ. Minas Gerais, between rt 116 and Salinas, 700 m ($16^{\circ}10'S$, $41^{\circ}15'W$), 700 m [54], 18 November 1974 (Roberts, Carbonell), 2♂♂, 2♀♀—ANSP. Minas Gerais, BR 116, km 771 ($16^{\circ}42'S$, $41^{\circ}29'W$) [54], October 1977 (O. Roppa), 1♀—UFRJ. Pará, Belém ($1^{\circ}25'S$, $48^{\circ}31'W$) [45], October 1980 (B. Silva), 4♂♂, 2♀♀—UFRJ. Pará, Monte Dourado-Rio Jari, Área 95, Plantação de Eucalipto ($0^{\circ}41'S$, $52^{\circ}48'W$) [40], 23 February 2005 (A. L. Nunes, C. E. Braga), 2♀♀—MPEG. Pará, Monte Dourado-Rio Jari, Castanhal, Mata Primária ($0^{\circ}41'S$, $52^{\circ}49'W$) [40], 22 February 2005 (A. L. Nunes, C. E. Braga), 1♀—MPEG. Rondônia, Vilhena ($12^{\circ}42'S$, $60^{\circ}06'W$) [46], November 1973 (M. Alvarenga), 1♀—UMMZ. Roraima, Ilha de Maracá ($3^{\circ}24'N$, $61^{\circ}39'W$) [39], June 1981 (M. Descamps), 2♂♂, 4♀♀—INPA; 2♂♂, 3♀♀—MNHN. São Paulo, São Paulo ($23^{\circ}34'S$, $46^{\circ}37'W$) [53], no date (A. Hempel), 1♂, 1♀—AMNH. São Paulo, São Paulo ($23^{\circ}34'S$, $46^{\circ}37'W$) [53], 14 September 1900, 1♂—AMNH. São Paulo, São Paulo ($23^{\circ}34'S$, $46^{\circ}37'W$) [53], 14 September 1900, type series of *C. ignotum* (Rehn), 2♂♂, 1♀—ANSP. **Colombia:** Guaviare, San José de Guaviare ($2^{\circ}34'N$, $72^{\circ}38'W$) [35], 14–16 December 1970 (M. Descamps), 1♂—MNHN. Meta, La Macarena ($2^{\circ}04'N$, $73^{\circ}57'W$) [35], 3–5 December 1970 (M. Descamps), 1♂—MNHN. **French Guiana:** Cayenne ($4^{\circ}56'N$, $52^{\circ}19'W$) [38], April 1917 (S. M. Klages), 5♂♂, 2♀♀, reported by Bruner, 1918 as *C. longipenne* (De Geer)—ANSP. Crique Anguille, Cayenne ($4^{\circ}49'N$, $52^{\circ}31'W$) [38], 3 March 1976 (M. Descamps), 3♂♂, 1♀—MNHN. Regina ($4^{\circ}18'N$, $52^{\circ}08'W$) [38], 18–19 April 1976 (M. Descamps), 1♂—ANSP; 20♂♂, 19♀♀—MNHN. Savane Matiti ($5^{\circ}04'N$, $52^{\circ}36'W$) [38], 7 July 1977 (M. Descamps), 1♂, 1♀—ANSP; 1♂, 5♀♀—MNHN. Sinnamary ($5^{\circ}22'N$, $52^{\circ}57'W$) [38], 6–7 July 1977 (M. Descamps), 3♀♀—MNHN. St. Laurent du Maroni ($5^{\circ}30'N$, $54^{\circ}01'W$) [38], 16 October 1969 (Balachowski-Gruner), 4♂♂—MNHN. **Guyana:** North-West District ($7^{\circ}44'N$, $60^{\circ}01'W$) [38], March 1934 (F. A. Squire), 1♂—NHM. **Paraguay:** Central, Asunción ($25^{\circ}17'S$,

$57^{\circ}38'W$) [50] 13 October 1980 (D. C. Lowrie), 1♀—NMNH. Cordillera, San Bernardino ($25^{\circ}16'S$, $57^{\circ}19'W$) [50], November (L. Bruner), 1♀ (holotype of *P. paraguayense*)—ANSP. Paraguarí, Sapucay ($25^{\circ}40'S$, $56^{\circ}57'W$) [50], 14–15 January 1972 (M. Descamps), 2♂♂, 1♀—ANSP; 3♂♂, 2♀♀—MNHN. **Suriname:** Paramaribo ($5^{\circ}49'N$, $55^{\circ}10'W$) [38], February 1968, on *Eichhornia crassipes* (F. D. Bennett, H. Zweifler), 1♀—ANSP. **Trinidad:** Brasso ($10^{\circ}24'N$, $61^{\circ}19'W$) [27], 16 January 1930 (G. Belmontes), 1♀—ANSP. Moruga area ($10^{\circ}04'N$, $61^{\circ}16'W$) [27], February to March 1985 (G. B. Popov), 2♂♂—NHM. Moruga area ($10^{\circ}04'N$, $61^{\circ}16'W$) [27], March 1986 (G. B. Popov), 10♂♂, 5♀♀—NHM. Piarco Savannah, marshy patch ($10^{\circ}34'N$, $61^{\circ}19'W$) [27], 8 July 1942 (D. Kevan), 1♀—NHM. Sangre Grande ($10^{\circ}35'N$, $61^{\circ}08'W$) [27], B.W.I., 3 April 1930 (G. Belmontes), 1♂, 1♀—ANSP. Wallen Pielo (=Waller field) ($10^{\circ}37'N$, $61^{\circ}13'W$) [27], 11 March 1986 (G. B. Popov), 1♂—NHM. **Uruguay:** Artigas, San Gregorio ($30^{\circ}33'S$, $57^{\circ}52'W$) [51], 30 April 1963 (Carbonell, Mesa), 1♂—FCMU. San José, Chamizo ($34^{\circ}10'S$, $56^{\circ}40'W$) [51], 6 February 1965 (L. Lage), 1♀—FCMU.

Acknowledgments

We are grateful to the following colleagues for their valuable comments: Carlos S. Carbonell, Facultad de Ciencias, Universidad de la República, Montevideo, Uruguay; María Marta Cigliano, Museo de Ciencias Naturales, La Plata, Argentina; Edward G. Brede and Pia Parolin, AG Tropenökologie, Max-Planck-Institut für Limnologie, Plön, Germany; Marinéz I. Marques, Instituto de Biociências, Universidade Federal de Mato Grosso, Cuiabá, Brazil; and María Laura de Wysiecki, Centro de Estudios Parasitológicos y de Vectores (CEPAVE), La Plata, Argentina. Special thanks to Miguel Monné for compiling and transmitting *Cornops* data from the Museu Nacional, Rio de Janeiro, Brazil. George Beccaloni is thanked for the loan of specimens from The Natural History Museum, London, UK and K. H. Lampe for the loan of specimens from the Forschungsmuseum Koenig, Bonn, Germany. Thanks go to E. Drago, M. Marchese, S. Capello (INALI, Santo Tomé/Argentina), A. Poi de Neiff, J. J. Neiff, M. C. Franceschini (CECOAL-CONICET, Corrientes/Argentina), to the late H. Oberholzer, M. Hill (ACU, Pretoria/South Africa), as well Perry Polar and Moses Kairo (CABI, Trinidad) for help given to J. Adis to obtain specimens. M. Lhano is grateful to CAPES (Brazilian Ministry of Education) for financial support.
